SUMMARY

Hello! I'm a Fullstack Software Engineer with 5+ years of experience in building and scaling SaaS using React, Next.js, Django, and Supabase. Skilled in designing reusable UI systems, API architecture, CI/CD automation, and collaborative remote development. I thrive in startup environments that values autonomy and ownership.

WORK EXPERIENCE

Attraxia **Mar 2023 - Oct 2025**

HelloMateo - Fullstack developer (Frontend Heavy) **Jun 2023 - Oct 2025**

- Understanding, planning, building and maintaining large featuresets that are considered product's major upsell points (Workflow builder, automation tools...) using Typescript, NextJS & Shadcn, ReactNative and Supabase.
- Continuously looking and participating in enhancing product for users while also minimising and documenting the tech debt in the process while periodically making time for cleaning it.
- Actively reviewing and guiding teammates and ensuring high speed, quality review and publish process which lead to shorter PR cycles.
- Ensuring high quality and effective communication process with remote colleagues.
- Speed in adapting and shifting to priorities and product needs.

UMUS Connect - Fullstack developer **Mar 2023 - Aug 2023**

- Communication , planning with client and analysing requirements.
- Built a desktop client using EelectronJS and ReactJS that served as a version control for content shared between artists and studios. It uses RSYNC for data transfer.
- Built a web dashboard based on Django administration dashboard that allowed sytem admins to manage content, users and permissions stored in a remote storage server.
- Collaborating with the client's internal IT team to ensure sealmless releases and handovers.

Lasting Dynamics SRL **Mar 2022 - Mar 2023**

Coraly - Frontend developer **Mar 2023 - Sep 2022**

- Analyzed client requirements and split them into milestones with an accurate estimation following agile methodologies.
- Worked with ReactJS to create reusable UI components using TypeScript.
- Refactored the codebase and improved board loading with hundreds of tickets from more than 3min to less than 2sec.
- Performing code review for other teammates to ensure bug-free deliveries.

OMNE by FWD - Frontend mobile developer **Sep 2022 - Mar 2023**

- Leading and guiding a micro team of 4 developers while handling communication with product owners and managers.
- Worked on the building and maintenance of FWD Insurance main mobile application and libraries using ReactNative and Typescript.
- Writing unit and integration tests for the application components.
- Performing code review for other teammates to ensure bug-free deliveries.
- Providing automations scripts and shared workspaces that helped speeding up QA process from hours to just few seconds and enhancing collaboration between developers.

SwissDigiLab

Aug 2020 - Nov 2021

Swiss Gun Center Management - Fullstack developer

Aug 2020 - Jun 2021

- Building a fullstack platform for managing Swiss gun center using ReactJS, Django and Django REST Framework starting from a legacy app that was built using Laravel framework.
- Maintenance of the legacy codebase during the new software development.
- Performing code review for other teammates to ensure bug-free deliveries.
- Development of Docker images for the application services.
- Implementation and the management of CI/CD pipelines using Jenkins.

Zenbooking - Fullstack developer

Jun 2021 - Nov 2021

- Building a fullstack platform for events management using ReactJS, Django and Django REST Framework.
- Performing code review for other teammates to ensure bug-free deliveries.
- Development of Docker images for the application services.
- Implementation and the management of CI/CD pipelines using Jenkins.

EDUCATION

Master and Engineering in Computer Science

Sep 2017 - Jul 2022

Higher School of Computer Science - Sidi Bel Abbes

- Thesis on "2D and 3D face recognition".

ADDITIONAL INFORMATION

- **Technical Skills:** Javascript & Typescript, ReactJS, NextJS, ReactNative, React Query & SWR, Redux, Supabase, HTML & CSS, TailwindCSS, Docker, Python, Django & Django REST Framework, SQL, Git.
- **Tools:** Github & Github Actions, Gitlab, Bitbucket, Github Copilot, Cursor, Digital Ocean, Linear, Jira, Vercel, Posthog.
